ZODIAC

I've studied astrology for over two decades, and the vastness of the planets never ceases to amaze me. Throughout millennia, humans have sought meaning, guidance, and answers by looking up to the heavens. Yet, I believe our undeniable connection with the stars stems from the fact that we are, in essence, made of stardust. All sentient beings and elements on Earth share this cosmic origin, and astrology provides shapes, meaning, and poetry to the constellations that grace the night sky.

Bed Threads approached me to paint the zodiac signs, and the project enabled a deep and profound connection with each sign. I deepened my understanding of the essence, seasons, symbolism, and mythic origins of every sign, delving even further into the infinite realm of the cosmos.

While the prints will exclusively be available on Bed Threads' website, I've retained the physical paintings I contributed to as the illustrator for this zodiac collection. I present these "Secret Paintings" with gratitude, intending to enhance your wanderlust for the universe and forge a connection to the stars, bringing forth an inner awareness that you are the beauty of the cosmos made manifest.
